Excel Automation & Macro Submission

ACCOUNT SALES DATA ANALYSIS & AUTOMATED SORTING INTERFACE

1. Interactive Workbook Interface

High-resolution view of the **Account Sales Data** worksheet, displaying the dataset and embedded macro control buttons (**Unit Sales** and **5YRB1**) for automated sorting and filtering.

Workbook Worksheet with Macro Buttons

Figure 1.1: Full workbook view featuring macro button controls and active account sales data.

Key Interface Elements

- **Unit Sales Button:** Triggers macro to sort data descending by 2021 Unit Sales.
- **5YRB1 Button:** Executes filtering based on 5-Year CAGR metric thresholds.
- **Embedded Macro Controls:** Placed near active data headers for immediate execution.

2. Visual Basic for Applications (VBA) Code

Capture of the Microsoft Visual Basic for Applications (VBA) environment showing `Module1` and the active `UnitSales` sorting subroutine.

VBA Editor Code Screenshot

Figure 2.1: Integrated Development Environment (IDE) capture of the VBA source code module.

3. Macro Source Code

```
Sub UnitSales()
  ' UnitSales Macro - Clears existing sort fields and sorts 2021 sales descending
  ActiveWorkbook.Worksheets("Account Sales Data").AutoFilter.Sort.SortFields.Clear
  ActiveWorkbook.Worksheets("Account Sales Data").AutoFilter.Sort.SortFields.Add _
    Key:=Range("L1:L41"), SortOn:=xlSortOnValues, Order:=xlDescending,
DataOption:=xlSortNormal
  With ActiveWorkbook.Worksheets("Account Sales Data").AutoFilter.Sort
    .Header = xlYes
    .MatchCase = False
    .Orientation = xlTopToBottom
    .Apply
  End With
End Sub
```
